

My Rich Uncle

Escape Room Team Building

The virtual My Rich Uncle is a fun and challenging escape room remote team building program.

The virtual My Rich Uncle is a virtual team building activity for up to 100 people. Your rich Great Uncle has recently passed away leaving a video last will and testament. In the will he leaves his entire fortune to his one-true heir.

The fortune is locked in a briefcase. All you have to do to claim the fortune is to prove that you are the true heir by unlocking the briefcase. This is a great opportunity to continue strengthening your remote team!

Event details and storyline

Unfortunately, your fantastically wealthy Great Uncle has just passed away. However, he has left a will with specific instructions that his entire fortune is to be inherited by his one true heir. Now, you just have to prove that you are this heir. Your uncle's attorney enters the room and plays a somewhat tongue-in-cheek will and testament via a video recording. The attorney divides the audience into small teams, and the race is on.

As the story unfolds, each of these newly designed teams must work together to solve challenges. Each team, in this escape room team building activity, gets an identical box of clues. So, unlike most escape rooms, this one has an unlimited group size. In addition, each group can look around the room to see how far ahead (or how far behind) they are. So, if your team is competitive, this is a fun way to get the energy up in any room!

Optimal time and event size

This virtual event is perfect for any group size up to 100 people. The optimal length for this event is between 1 to 1.5 hours. A longer session lends more to the reinforcement of what is covered and understanding how it can be applied to your company.

Advantages of this program

- Virtual classroom will allow your team to join from anywhere in the world
- This program has a high concentration of team development so it is a fun way to bring everyone together and grow
- Your team will have a lot of fun while learning
